I had sent the sheet to Deb for review on Friday. I just have a couple of minor changes to make, check it over to see if I missed anything and it will be ready today. I was waiting to check with Deb.

Is our Ph 1/2 spreadsheet ready to go?

This is why we keep you around, Rob! :) You're great at striking the balance between preventing the number of folders and subfolders from getting out of control and providing the best, most logical way for people to find the documents they need.

Wherever you and Ayn decide these docs (and possibly future docs related to these) go, I definitely trust your judgement.

Thanks!
--Tim (back in town now)

Subject: Location of new Pavillion Data Spreadsheets

Ayn,

When the time comes, I would recommend posting the new data spreadsheets in a separate folder on the Pavillion Site Documents webpage (<http://www.epa.gov/region8/superfund/wy/pavillion/docs.html>).

There really isn't a good spot in the folder hierarchy that makes sense to me. Therefore I'd recommend, if possible, creating a new top level folder called something like "Analytical Results Summary Tables" or something like that and inside that folder have folders for each of the phases, which will house the spreadsheets. I would created a folder for each of the phases to simplify each folder in the event we have multiple documents for each phase.

Thoughts?
